Enjoy our fresh panel approach, at Pink Hope's QLD Information & Support Day for those at increased risk of breast, ovarian or prostate cancer due to an identified gene mutation or family health history. Families, carers and supporters are very welcome.

The Information & Support Day will include **expert speakers** who will present evidence-based information and research on different aspects relevant to the high-risk community. The day will also include personal stories from high-risk community members and time for networking.

For the full event agenda, please see the Pink Hope website [www.pinkhope.org.au](http://www.pinkhope.org.au) and search for events.

*This is a great opportunity to connect with other individuals who are at increased risk of cancer, in a relaxed setting.*
